

Z Series Specialty Components

SPS 140

One of our most versatile designs, the SPS-140 speaker protector/selector allows you to instantly expand or reconfigure your system, while protecting your amplifier from potentially damaging low impedance multi-speaker loads. Want to add subwoofer power for daytime and cut it at night? Switch back and forth between audio monitors? Add extra stereo pairs to a remote zone? This Z-series component does all those and more. It's a winner, and with it, your system will be, too!

What is Parasound's Z-Series? It's the highest-fidelity set of matched miniatures available today. Only 2" tall and 9-1/2" wide, Z's can stand alone on the smallest surface, or rack mount side by side. Wherever you want a minimum-size system with maximum-quality sound – on desktop, counter, in-wall or multi-zone – the Z-Series is your compact sonic solution.

Features

- Selects up to four pairs of loudspeakers
- Exclusive non-inductive amplifier protection circuitry to prevent amplifier oscillation
- 250 watt maximum protection rating
- Gold plated barrier type speaker terminals
- 16 Gold plated 12 AWG spades lugs included
- 9-1/2" wide front panel; 1 rack space high
- Fastening hardware available for rack mounting
- Parasound's 10 years parts, 5 years labor warranty

Specifications

- Protection wattage: Internal 60 watt non-inductive resistors protect amplifiers up to 250 watts per channel
- Dimensions: 9-1/2" w x 2" h x 7" d, 1-3/4" h without feet
- Shipping weight: 5 lbs.
